The screenshot shows a VS Code editor with a project named 'my-new-project'. The Explorer sidebar on the left shows the file structure, including 'components' and 'app'. The main editor area displays the 'index.tsx' file, which contains a `DataTable` component. The component is a table with three columns: 'Name', 'Favourite Food', and 'Age'. It has five rows of data: Radhika (Dosa, 23), Krishna (Uttapam, 26), Vanshika (Brownie, 20), and Teena (Pizza, 24). The terminal at the bottom shows error logs from the Expo development server, indicating a failure to resolve the `./components/DataTable` path from the `app/index.tsx` file.

```
1 import React from 'react'; 7.8k (gzipped: 3k)
2 import { StyleSheet } from 'react-native';
3 import { DataTable } from 'react-native-paper';
4
5 const TableExample = () => {
6   return (
7     <DataTable style={styles.container}>
8       <DataTable.Header style={styles.tableHeader}>
9         <DataTable.Title>Name</DataTable.Title>
10        <DataTable.Title>Favourite Food</DataTable.Title>
11        <DataTable.Title>Age</DataTable.Title>
12      </DataTable.Header>
13      <DataTable.Row>
14        <DataTable.Cell>Radhika</DataTable.Cell>
15        <DataTable.Cell>Dosa</DataTable.Cell>

23      <DataTable.Row>
24        <DataTable.Cell>Vanshika</DataTable.Cell>
25      </DataTable.Row>
26    </DataTable>
27  );
28}
29
30 export default TableExample;

The screenshot shows a web browser window at localhost:8081 displaying the rendered output of the `index` component. It is a table with three columns: 'Name', 'Favourite Food', and 'Age'. The table contains five rows of data: Radhika (Dosa, 23), Krishna (Uttapam, 26), Vanshika (Brownie, 20), and Teena (Pizza, 24).

Name	Favourite Food	Age
Radhika	Dosa	23
Krishna	Uttapam	26
Vanshika	Brownie	20
Teena	Pizza	24
